

TEMPERATURE & HUMIDITY SENSOR

The Temperature-Humidity sensor is a LoRaWAN[®] Class A wireless sensor that measures and transmits temperature and humidity over a long distance.

APPLICATIONS

- HVAC (Heating, Ventilation and Air Conditioning)
- Building management
- Logistics / storage
- Data centre / IT server room

BENEFITS & KEY FEATURES

- LoRaWAN[®], Class A
- Easy to use and deploy
- Up to 10 years autonomy
- Temperature and Humidity measurements
- Range:0°C/+55°C;0%rH/100%rH
- Accuracy: +/-0.2°C; +/-2%rH
- Resolution: 0.1°C; 0.5%rH
- Data compression with batch report

CERTIFICATION

RED, RoHS

The sensor measures the temperature and relative humidity indoors. Data transmission over a public or private LoRaWAN[®] network is done periodically or immediately in case of alert:

- Minimum and maximum temperature thresholds exceeded,
- Minimum and maximum humidity thresholds exceeded,
- Sensor unclipped from its wall mounting.

Installation and commissioning are quick and easy. The sensor is equipped with:

- a switch (ILS) for activation and deactivation,
- LEDs to monitor the configuration and pairing to the network.

Each sensor is identified by a QR code on the label and an NFC tag inside the housing.

The measurement data is transmitted individually or aggregated and compressed (batch mode) before being transmitted over the LoRaWAN[®] network.

Batch mode significantly reduces the amount of data transmitted while preserving the sensor's autonomy.

Powered by a 3.6V/2600mAh battery, the sensor's autonomy is over 8 years with a configuration of 1 measurements every 10 minutes and 1 transmissions per hour.

The battery voltage level can be regularly monitored remotely.

THE LARGEST IOT PRODUCTS RANGE FOR YOUR PROJECT

WATTECO is a European leader in the design and manufacture of smart IoT devices to suit all remote reading and data collection solutions.

WATTECO is a LoRa Alliance® member.
