

# Bathroom Occupancy Sensor

Featuring LoRaWAN®

# VS330

VS330 is a LoRaWAN<sup>®</sup> bathroom occupancy sensor providing a cost-effective solution for monitoring the occupancy status of the bathrooms and the cubicles of a public toilet in different scenarios. VS330 has combined dual technologies, Time-of-Flight (ToF) technology and Passive Infrared (PIR) sensor to identify the human body and motions with a smart logic and an industry-leading accuracy exceeding 99.5%. VS330 could easily adjust to different scenarios with 100% anonymity and low power consumption.

VS330 could be managed by integrated systems and it allows users to monitor the occupancy and trigger linkage to control other devices via a web browser or mobile App remotely. Damp-proof coating inside ensures it working well under various conditions.
